City Change Makers Workshop #1

Session Introduction

Date & Time 07.08.24 10am-3pm

Venue Samaritan House, Govanhill

We will...

- + Get to know people, their personalities and how they work
- + Define what the themes Wellbeing, Sustainability and Fairness mean to them
- + Introduce the group's challenges
- + Start to develop a vision of what the future could look like

There were...

10 participants with Make Do + Grow;
5 participants with Govanhill HA (5 others were unable to attend this date)

Session 1 summary

The City Change Makers Introduction session looked at setting the tone for the programme. We focussed on **getting to know the two groups with activities that set up team pacts, explored the core themes, introduced the group challenges and developed future visions.**

We learned about what motivates people as individuals, what they are good at and what worried them about the programme. Creating **team pacts** helped to define a shared narrative of how they want to work together through the programme.

Using themes informed by the Thriving Glasgow Portrait we started to explore how we might create a common language with the groups. We also wanted to give context to the projects in relation to the city's Climate Strategy and Sustainability aims and objectives. The groups discussed **what Wellbeing, Sustainability and Fairness meant to them** and created definitions that reflected their own experience.

Presentations from the partner organisations, Make Do and Grow and Govanhill HA **introduced the local context and challenges** that groups will start to unpack in the following session.

What it looked like...

Everyone received a pack including totebags, folder, programme info, notebooks and stickers

My hopes are...
contributing towards improving Govanhill as a place to live for all members of the community

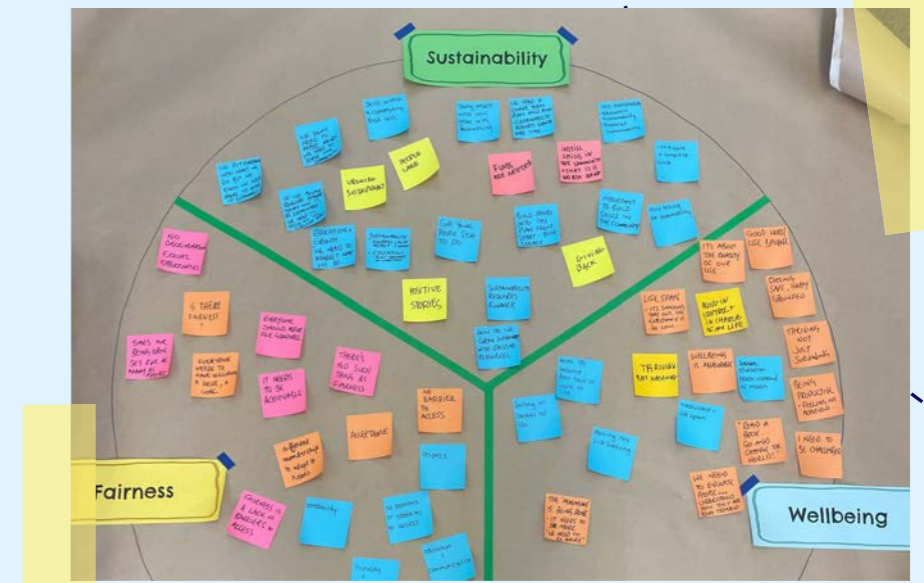

My fears are...
my future for my kids - what will things be like for them in 20 years when it's like this now

Profiles showed us what people want to get from the programme

Each group created a team pact describing how they will work together

We learned about what the 3 themes mean to them

What it looked like...

Your challenge is...

Scale the Toy Library in Govan to ensure families have equal access to support, resources and joy. This aims to reduce the impacts of poverty, and work towards removing the stigma associated with second hand items.

Make Do and Grow

Your challenge is...

Combat waste disposal issues in Govanhill that result from urban density, a lack of community ownership and diverse lifestyles.

Govanhill Housing Association

Groups discussed what their vision for the future is and what they would like to change

Gosia and Anna from Make Do + Grow and David and Christina from Govanhill HA presented their local context and challenges

What's next

Session 2 will look at defining the group challenges by unpacking the problems that people see locally, exploring what they are doing and who it is for.
